

Latex Gauntlet Pattern

To find your right size, measure the span of your palm and your wrist.

This pattern is made for size **medium** and should fit an average hand.

Latex gauge: 0.30mm - 0.40mm

Palm span: 18-19.5cm

Wrist: 14-15cm

The dashed line shows you where you can make the pattern bigger or smaller. Or you can even cut it there to make the gauntlet out of two pieces, in case you have only small latex scraps left.

The marked lines are those which have to be glued together.
